SUMMARY

I am a 3rd year B.Tech IT student who is passionate about technology and always curious to learn new things. I have intermediate technical skills and good knowledge of drone technology and its applications. I have a strong mindset toward learning, improving my skills, and exploring emerging technologies. I am currently looking for internship or entry-level opportunities where I can gain practical experience and grow in the tech industry.

EXPERIENCE

Student Assistant

University IT Department

- Provided technical support for students and faculty, ensuring smooth operation of academic technology resources.
- Assisted in organizing IT workshops and events, fostering community engagement and learning.
- Guided participants on practical concepts, project building, and real-world technology applications.
- Organized and coordinated sessions to promote hands-on learning and technical awareness.

EDUCATION

Bachelor of Technology in IT CGPA 7.08
Sathyabama Institute of Science and Technology
8/2023 - 3/2027

Higher Secondary Education May 2022
Science and Mathematics
Velammal Matriculation Higher Secondary School

Secondary Education March 2023
Velammal Matriculation Higher Secondary School

CERTIFICATION

Professional Training in Drone Technology - Completed hands-on training covering drone components, flight systems, and real-world applications.

Cybersecurity / Ethical Hacking Training - Gained foundational knowledge in cybersecurity concepts, network security, and ethical hacking practices.

GenAI Powered Data Analytics Job Simulation - Completed certificate in GenAI Powered Data Analytics.

CyberSecurity Analyst Job Simulation - Completed certificate in CyberSecurity Analyst job Simulation provided by TATA.

SKILLS

- Programming Languages - C, C++, Python
- Web Development - HTML, CSS
- Database Management - Mongo DB
- Technical Support
- Team Collaboration
- Problem Solving
- Drone Technology
- Tools & Platforms - GitHub, Figma, VS Code, Kali linux, Ubuntu

PROJECTS

Surveillance Drone - Designed and built a surveillance drone with an onboard camera for real-time monitoring. Integrated YOLO (You Only Look Once) based object detection to identify objects from live aerial footage.

Rover - Co-developed a robotic rover integrated with gas and temperature sensors and a camera module for real-time monitoring and data collection. The system was designed for environmental sensing and remote surveillance applications.

LEADERSHIP / RESPONSIBILITIES

- Organized and conducted multiple technical workshops for students.
- Coordinated technical events and managed participant activities.
- Mentored students during hands-on sessions and technology demonstrations.

INTERESTS

- Drone technology
- Web development
- AI tools
- Open-source projects
- Learning new emerging technologies.
- Animation, Editing and Videography
